World Mission Sunday is next week!

In the spring, we brought up the concern that with open pit mining, poverty increases. Environmental damage occurs in many countries such as the Philippines, Madagascar, the Honduras and others who do not have the ability to take action and advocate for change. They need us to assist them in their battle for clean water, unpolluted rivers and to preserve the beauty of the earth. This fall campaign now brings to the fore the problem of seeds being controlled by corporations – patented and affecting the right of farmers to save, use and exchange seeds. Often, it has been made illegal to do so in some countries.

Please explore the information available in the entrance.
