## Development and Peace Fall Campaign

We have a big problem that is affecting our supply of seeds to grow food. Seeds are being controlled by corporations – patented and under their control! Thus, affecting the right of farmers to save, use and exchange seeds. Often, it has been made illegal to do so in some countries.

As a result, we are losing our biodiversity as the mutations of the seeds overwhelm the original seeds. The original seeds are in jeopardy of disappearing as the farmers end up being forced to use the corporations seeds.

Please explore the information available in the entrance.
